PROFESSIONAL EXPERIENCE

Senior Software Engineer | Mindfire Solutions

Dec 2023 - Present

- Built scalable, responsive, and accessible web interfaces with React, Next.js, TypeScript, React Query, reusable components, lazy loading, and code splitting.
- Designed and built the core of an ETL-inspired CRM migration platform that processed billions of records and transferred associated files between CRM systems. Implemented parallel processing with Node.js and Amazon SQS, checkpointing and retries with DynamoDB, safe job resumption, and scalable deployment on AWS ECS.
- Implemented an end-to-end encrypted file-sharing platform with secure client-side encryption, key handling, and shared-key access for private and shared file workflows.
- Integrated AWS Cognito and NextAuth authentication, SignalR real-time updates, security headers, SBOM generation, dependency scanning, and CI/CD security checks.
- Upgraded and maintained React Native applications, integrated Firebase Cloud Messaging, and supported stable App Store and Play Store releases.
- Built a document-focused RAG workflow using Hugging Face embeddings, vector retrieval, and Gemini for contextual responses; currently expanding practical knowledge of agentic AI patterns.
